

# DIGITAL TEMPERATURE INDICATORS

## NEF22-TEMP

### DATA SHEET

no: KK-W\_NEF22-TEMP

Temperature indicators NEF22-TEMP complete series NEF22 consisting of control buttons, signal lamps and LED indicators. Temperature indicators have been designed to be used as industrial panel indicators together with another NEF22 devices.

Indicator is equipped with probe including sensor (standard length 3m).

In case of NEF22-TEMP indicator, the emergency level has been set on fixed temperature 60°C.

The indicators are adapted for mounting in standard holes  $\varnothing 22.5$  mm.

### TECHNICAL DATA:

Parameter	Value
Supply voltage	24V AC/DC
Power consumption	max 1W
Protection class	IP66/67 over the desk IP20 cover and connections
Display	2 LED digits, height 10mm
Temperature	-20÷60°C
Max cross-sections of terminals	1,5 mm <sup>2</sup>
Interference immunity	acc. to PN-EN 61000-6-2
Interference emission	acc. to PN-EN 61000-6-4
Useful range of measurement	-9°C to 99°C
Basic accuracy for temperature range -9°C to 99°C	±1°C

	Designation	Weight [g]
	NEF22-TEMP	103 <sup>1)</sup>

<sup>1)</sup> weight of the indicator together with measuring probe
